

Sound Reading System teaching at Deyes High School

After training in February 2013, I was very nervous starting the SRS but once I got started was amazed at how easy it is to teach it. I love the fact that every lesson is planned, you always know what point you are up to and everything is very easy to follow.

The pupils pick it up so quickly and get into the routine of saying their sounds, doing their sound lines etc. We have had some very impressive results even after 10 weeks and parents have been delighted their son/daughters progress.

The 4 day course is intensive but the rewards are so worth it. I would recommend SRS to every school as at the end of the day we want our pupils to leave school feeling confident about reading, writing but most of all to be happy and be independent. SRS will do this for them.
